Table of Contents

Wireframes-Low Fidelity

The Restrobar's website contains a Home Page where visitors first land and typically showcases the restaurant's branding, a brief introduction to the restaurant, and enticing imagery of the food, menu items, or the restaurant itself. Clicking on Menu, the navigation goes to the Menu Page where visitors can view the different types of food and drink offerings the restaurant provides. It typically includes categories such as Breakfast, Lunch, and Dinner. Then there is a Blog page where visitors can view restaurant and Chef's column information. The Contact Page is where visitors can find information about the restaurant's physical location(s), hours of operation, and contact information. It may also include a map with directions and information on parking.
